

## Sources of energy – Oil      مصادر الطاقة – النفط

Energy is very important in our life. There are many sources of energy. They are oil, gas, coal, wind power and wave power. Oil is finite and it could run out. We should find other sources of energy. We can use renewable oils from grain and wood chips. Using renewable oils and crude oil reduces costs and pollution. Using too much energy causes pollution and global warming.

We should use renewable natural energy like wave power, wind power and solar power. They are clean sources of energy. They don't cause pollution. They can produce energy for the whole planet. We should reduce using energy in our cars. We can share cars and use small cars and buses. We should reduce using energy in our daily life. We can turn off lights and gas after use. We should plant more trees.

Really, we should save energy everywhere.

## Modern Technology      التكنولوجيا الحديثة

Modern technology is very important in our life. It has made our life faster and easier. It has saved much time and effort. It has made the world a small village. We can communicate with people all over the world by mobiles. We can listen and watch live news on TV. We can get the latest information and news by the Internet. In the future, there will be flying cars and smart roads. There will be no accidents or traffic jam. The micro robot will help doctors to repair ill organs. The nano-shells will help doctors to find cancer tumours. The Robo-mate will do all the houseworks.

On the other hand, modern technology has some disadvantages. Computer games have made us idle and lazy. Children waste much time on playing computer games. We have less time to play sport. Modern technology may cause health problems as obesity and stress.

Really, we should use modern technology carefully.

## Money      المال

We all know that money is very important in our life. We need money to pay for our daily needs. We need money to start a business. We use money to buy anything

How was life before money? In the past, people used to barter things. They used to barter shells, gold dust, corn, leather and animals. Nowadays, people use coins, cheques, bank cards and cash money to pay for things. It's said that money is the root of some evil. It can cause crimes. It can lead to wars.

I think money, good friends and family make the world go round. In my opinion, we should use money to help the poor. We can build houses, schools and hospitals for them. Really, Money can't buy health or happiness.

## Islamic Values / Virtues القيم والفضائل الإسلامية

Islam enjoins good values and morals. Islam enjoins modesty and patience. It orders us to show respectfulness and gratefulness to old people and parents.

According to Luqman's advice to his son, we should obey our parents. We should respect them. We should keep praying on time. We should be patient and modest. According to his advice also , we shouldn't be proud. We shouldn't be insolent or rude. We shouldn't speak loudly. We shouldn't associate anything with Allah. All people are equal in Islam. There is no difference between the white and black.

We should teach our children these Islamic rules. Really, Islamic rules help us to live in peace.

## Car accidents حوادث السيارات

Car accidents are increasing nowadays. They are very dangerous.

Car accidents kill a lot of people. Some people become handicapped because of car accidents.

There are many causes of car accidents. Firstly, people drive too fast. Secondly, they don't wear seatbelts. Thirdly, they don't follow traffic rules. Finally, traffic jam is a major cause of car accidents. It's a big problem. How can we solve it ?There are many ways to reduce them. Firstly, I think people should drive carefully. Secondly, they should wear seatbelts while driving. Thirdly, they should respect traffic rules. The traffic police can use speed cameras to fine careless drivers.

Finally, the government can make the roads wider and build many flyovers. Really, When we prevent a car accident, we may save our own life.

## Messages / Communication الرسائل – الاتصالات

Communication is very important in our life. People send messages for different reasons. They send messages to communicate with each other. They can pass information. They may save lives and ask for help.

In the past, people used different ways for sending messages. They used pigeons, fires and flags. They used smoke and messengers. Nowadays, people use different ways for sending messages. They use the Internet and e-mails. They use mobile phones and faxes. Some people send messages in bottles. When they feel lonely or they are in danger, they send messages in bottles. The stories of messages in bottles are memorable. They are fun, romantic and unusual way.

Really, I prefer to send messages in short to save time and cost.

## Women's ( role ) rights حقوق المرأة

A woman is half of the society. She is as important as a man. She is equal to a man. She has the same rights and the same duties. She is a successful doctor, teacher and lawyer. There are many businesswomen and pilots in Kuwait. Kuwait has given a woman her rights. She is a parliament member and a minister. She can represent her country abroad. A woman can be a mother, a sister, a daughter and a wife.

A good woman should have some qualities. She should have hard work, strong will and great ambitions. Dr. Massouma Al- Mubarak and Munira Buruki are good examples in Kuwait. Dr. Massouma Al- Mubarak is the first minister in Kuwait.

Really, when we have good mothers, we will have good generations.
