**The Outline (20 Marks)****Introduction****Body: Paragraph 1****Paragraph 2****Conclusion****The Topic ( 100 marks )**

## Reading Comprehension (110 marks)

**A. Read the following passage carefully, then answer the questions below:**

We must save water. Water is a precious resource on Planet Earth that all life forms need for their survival. Plants, trees and all forms of vegetation too need water to live. Human beings and all terrestrial life forms need water to drink. If clean water is not available to drink all life forms can die.

If we are unable to provide water for vegetation on the planet, we will also lose our food. Agriculture is based on water, and so in the absence of sufficient water we may lose the food we need to eat to stay live. We need water to cook food. Water is also needed by us for maintaining personal hygiene. We need water for keeping our homes and surroundings clean. Water is also used by various industries.

Water is not an unlimited resource. If water is wasted it is lost. Usable water must be used judiciously. The water in seas and oceans is not usable due to its salinity. Drinking water, for instance, must be used judiciously by man. The water that is available for man's use for his various needs must not be wasted. People must be sensitized on this issue. We must try to reduce wastage of water, and water must also, to the extent possible, be recycled through the use of appropriate technology and used creatively. For instance, recycled water can be used for watering gardens in homes and public parks.

By contaminating and polluting water bodies we create terrible environmental and ecological hazards. Water pollution is a matter of grave concern. When we dump plastics as also chemicals and synthetics into water bodies like lakes and rivers, the water that is used by us and other terrestrial life forms for drinking purposes becomes unfit for consumption. The dirty water is then to be treated and supplied to humans for **their** domestic use.

Animals, however, drink the water as it is and can perish. Besides, the aquatic creatures that live in the contaminated water bodies also suffer from diseases and **perish**. It is therefore important to keep the water bodies uncontaminated.

**A) From a, b, c and d choose the right answer: (5 X10 = 50)****1- The suitable title for this passage is : .....**

- a) polluting water                      b) saving water                      c) water consumption                      d) water distillation

**2- The underlined pronoun their in the fourth paragraph refers to.....**

- a) humans                      b) bodies                      c) synthetics                      d) purposes

**3- According to the text, the underlined word "perish" in the last Paragraph means:**

- a) infection                      b) death                      c) consumption                      d) poison

**4- Polluting water bodies is an environmental disaster and leads to.....**

- a) maintaining personal hygiene.                      b) reducing wastage of water  
c) environmental and ecological hazards.                      d) vegetation on the planet

**5- According to the passage, all the following statements are False Except :**

- a- Water is needed for maintaining personal hygiene.
- b- It is unimportant to keep the water bodies uncontaminated.
- c- Water is an unlimited resource,
- d- There is no need to recycle water

**C) Answer the following questions with reference to the passage :( 4 x15=60)**

5- What might happen if we were unable to afford water for vegetation?

.....

6- Why shouldn't animals drink dirty water?

.....

7- How can we keep water for the future?

.....

8- Why is water pollution a matter of grave concern?

.....

**VII- Summary Making (60 Marks)****Read the following passage, then do as required :**

Education is the most powerful weapon which we can use to change the world. Educating is when someone is instructed to improve their mind or character. Additionally, education is essential for everyone in which we can enlarge our knowledge over the world. Children have the right to be educated, educating children give them opportunity to have better future and educating children help to reduce crimes. Therefore, for this reason I agree that children should be educated to benefit themselves, families and nation as a whole. The future of a child is in his or her hand today. A child future depends mostly on his or her educational background. Children should be well educated to have a good qualification to gain more income to benefit them in the future. For instance, getting a good job and supporting the family.

**In a paragraph of FOUR sentences ONLY, summarise and paraphrase the previous passage in an answer to the following question: (4X15 = 60 Marks)**

**Why is education important for children?**

.....

.....

.....

.....

.....
