6. A good friendship is built on love and .....

7. If you want to buy a golden ring, go to the jewelry..... in the mall.

8. There are many ..... paintings at the Paris Museum.

**B- Reading Comprehension (16 Ms )****16****Read the following passage carefully, then answer the questions below**

The Koala Bear is one of the cutest animals in the world. It has a small body, grey coloured fur, and a white belly, and it does not have a tail. What's funny about the Koala Bear is that it is not a bear at all! The Koala is actually like Kangaroos, are animals that have pockets where they keep their young in. A newborn koala is called a joey and when it is born, it does not look like the grown-up koala we know. It is born blind and without ears or fur. Soon after its birth, the joey goes into the mother's pocket, and continues to grow its eyes, legs and fur for six months. The young Koala then leaves the pocket and mostly stays on the mother's back to grow for six more months. It stays there until it's ready to climb up the trees, sleep on the branches, and eat on its own. Koalas spend most of their lives in trees called "gum trees" and only go to the ground if necessary. Living in these trees helps them to easily reach their food and stay away from wild animals that might attack. Although gum leaves are poisonous to other animals, they are the only food koalas eat. The koala's stomach has special bacteria that can take energy and water from the leaves. When they are not climbing trees, koalas sleep up to 20 hours a day. A grown-up koala can grow to be around 15 to 20 years .

**A) Choose the correct answer from a, b, c and d: (6x2 = 12 Ms)****12****9. Which of the following is the best title of the text?**

- a) The Life of Koalas
- b. How to Raise Joeys
