One often sees that parents are always anxious about this issue. They are trying to force their **frightened** children to swim. I believe that pushing the little child to water can be a big mistake. This makes the child think it is dangerous to get his head under water.

When my children were young, we usually spent the weekends in mountains where there was a circular water tank. It was about two metres deep. I let **them** swim there. I never gave them rubber rings or water wings while they were in water. My eldest son began to jump into the tank. Soon, his brother and sister got used to water.
