- Read the following passage, then answer the questions below.

Nowadays you can find fast food restaurants in big cities around the world. Most people prefer fast food restaurants. Speed and price make **them** the favourite places to order their meals. Some people don't want to spend a lot of time preparing food. So, they can order what they want and eat it in about fifteen minutes. That's why they are called "fast food restaurants". The prices are also cheap because of the large number of meals sold every day.

People like to be comfortable and enjoy their food. The famous fast food restaurants like Hardee's make sure that a beef burger in Kuwait tastes the same as the one in New York and not different from the one bought in London.

An example of fast food is beef burgers. They have too much salt, fat and spices. This mixture of fat, sugar and salt causes the pleasure chemicals in the brain. That is why people like having fast food. But, some people say that they are not good for health. They don't have the important food elements which our bodies need.

Food experts advise us not to eat tinned food because it is not fresh. Sometimes, fast food is not well protected from dirt, dust, and insects, especially flies. Such food doesn't also have enough proteins and vitamins. So, eating fast food every day leads to **horrible** fatness and causes many dangerous diseases like heart attacks and high blood pressure.
