**B) Reading Comprehension ( 16 Marks)**

**Read the following passage carefully then answer the questions below:**

Ice cream is a sweet frozen food eaten as a snack or dessert. It is usually made from dairy products, such as milk and cream, and often combined with fruits and other flavours. Ice cream is one of the most popular desserts in the world. Over four billion gallons are **consumed** each year worldwide. Although many people enjoy this frozen dessert, not too many people know its history.

Eating frozen sweets started about two thousand years ago. In ancient Italy and China, ice was mixed with fruit or fruit juice. In ancient Rome, the Emperor Nero had snow brought down from the mountains and mixed with fruit.

The Arabs were the first people to add milk to frozen desserts. Instead of fruit juice, they added sugar. But sugar wasn't the only thing added. They also added dried fruits and nuts. As early as 1,000 years ago, ice cream could be found in Baghdad, Damascus and Cairo.

In the sixteenth century, a famous Italian princess brought ice cream to France. A hundred years later, in the seventeenth century, ice cream appeared in England. In the 1870's, a German engineer invented the freezer. This is when ice cream started to spread all over the world because it could be more easily made and transported.

These days the number of different flavours available is over 1,000. Frozen desserts have been around for a long time and will most likely be enjoyed well into the future.
