B. Reading Comprehension

Read the following passage carefully, then answer the questions below:

A grizzly bear hunts for fish in the river. A black rhinoceros runs across the plains of Africa. These animals share the Earth with us. They fascinate us with their beauty and we love learning about their habits. But just loving them is not enough. These animals are endangered. Many of them are dying, and without special care, they may someday disappear from Earth.

Africa was once filled with plenty of wild animals, but not anymore. One of these animals, the black rhinoceros, is powerful and can be dangerous. However, its strength can't always help it to **escape** hunters. Many hunters kill rhinos for their valuable horns. This has caused the black rhino to be placed on the endangered species list. The elephant is also endangered and is killed for its ivory tusks.

Unfortunately, it is people who cause many of the problems that animals face. We change and pollute their habitats. We hunt **them** for skins, tusks, furs, and horns. We destroy animals that get in the way of farming or building. And we remove them from their natural habitats and take them home as pets.

What can you do to help endangered animals? Make an effort to support zoos and wildlife groups. You can also be a smart shopper and never buy a pet that has been raised in the wilderness. If we allow even one species on Earth to die out, it affects other living things and changes our world.

A. Reading Comprehension

Read the following text carefully then answer the questions below:

Are you an only child? Are you the oldest, the youngest or somewhere in the middle? Middle children are often good at making everyone happy. Unfortunately, they are not usually rich. Often they are not well-educated and don't have a good job. They get less attention than older children, and less money and time are spent on them. Don't worry about being a middle child though - famous and successful middle children include Bill Gates.

The youngest children are often very creative. **They** are given lots of attention from their older brothers and sisters. So, their games and entertainment are often more creative. Many youngest children have successful careers in journalism and sales. Lots of famous actors and actresses are youngest children.

The most successful children are only children and first-born children. More than half of all Nobel Prize winners are first-born. Also, more people studying medicine, law and engineering are first born than middle or youngest. While middle children are easy-going, first borns are ambitious and **aggressive**. They are also often more intelligent.

So how can we explain differences? Well, first-born and only children have more attention. For only children, there is more money in a small family, so more money is spent on them. First-borns and only children are spoken to more like an adult and spend more time with adults. As a result, if the family has another child, the oldest becomes like another parent.

B. Reading Comprehension

Read the following passage carefully, then answer the questions below:

Chess is called the game of kings. It is a two-player board game. One player uses the white pieces. The other uses the black pieces. Each piece moves in a special way. One piece is called the king. Each player has his own king. The players take turns moving their pieces. If a player lands on a piece, he or she takes it. The game ends when a player loses his or her king. There are a few more rules, but those are the basics.

Some people think that chess is more than a game. They think it makes the mind stronger. Good chess players use their brains. They think about what will happen next. These skills are useful in life and in chess. Chess is a kind of work out for the mind.

There is a type of chess that is called 'Blitz Chess'. In blitz chess, each player gets ten minutes to use for the whole game. Your clock runs during your turn. You hit the time clock after your move. This stops your clock. It also starts the other player's clock. If you run out of time, you lose. Games of blitz chess are fast-paced.

Chess is not just for people. Computers have been playing chess since the 1970s. At first, they made mistakes. As time went on, they grew stronger. In 1997, a computer called Deep Blue could beat the best player in the world. It was the first computer chess-playing system to win a chess game. By 2006, a cell phone could beat the best players in the world.

C.Reading Comprehension

Read the following passage, then answer the questions that follow:

Mexico City is one of the most polluted cities in the world. It has been said that Mexico City's air has gone from being one of the world's cleanest to one of the world's most polluted. Unfortunately, the worst problem gripping the city is the **massive** cloud of smog that hangs over it almost every day. Mexico City has the highest level of ground level ozone in the world, according to the World Health Organization.

There are mountains all around the city and there is not much wind, so the pollution is not blown away. The people of Mexico City have tried to cut the pollution out. They have moved the factories outside the city. They have planted more trees to produce oxygen and keep the air clean. There are new traffic rules so that there are fewer cars on the city roads. They put signs of different colours on all the cars. So there are some colours of cars for every day.

London also used to have the same problem as Mexico. Now drivers have to pay money to drive into the centre of London during working hours. This has succeeded in reducing the number of drivers who come into London every day. Many people now use buses and trains instead of **their** own cars.

B. Reading Comprehension

Read the following passage then answer the questions below:

Once in a rainy night, a doctor lived happily in a village, about ten kilometers from the city. The doctor was a **kind-hearted** man. He helped poor people without paying any money.

One day a woman went to his house and asked him to go with her to see her old husband who was about to die. The doctor wore his thick coat and followed her to her house. When he came in, he found that the family was very poor. The man in bed wasn't very ill, but he had a hungry look on his face and there was no food in the house.

After looking at the man, the doctor said to the woman, "Come to my house this afternoon and I'll give you medicine for your husband." When the woman went to the doctor's house, **he** gave her a small box which was very heavy. The woman was very surprised at the weight of the medicine. When she came home, she sat near her husband's bed and opened the box which was full of money.
